

The DB-3 diode block is manufactured according to the technical requirements of SOR Libchavy. The connection is made according to the specified schematic drawing. Connector type AMP 828 801-7 used. Diode blocks are produced at the customer's request and can be modified differently.

Characteristic features:

$\vartheta_a = -40^{\circ}\text{C}$ to $+85^{\circ}\text{C}$

$\vartheta_a = -40^{\circ}\text{F}$ to $+185^{\circ}\text{F}$

Symbol	Parameter	Size			Value
		min.		max.	
U _{cc}	Power voltage	18		32	V
U _{ZAV}	Containment voltage - maximum			800	V
I	Current load			1	A

Technical drawing: black plastic

montážní díry rozteč 192 x 48 mm
